- M.2 NGFF!
- 3G / 4G / LTE / 5G!
- USB/PCIe interface!

The SIM8262X-M2 is the Multi-Band 5G NR/LTE-FDD/LTE- TDD/HSPA+ module which supports R16 5G NSA/SA.

It has strong extension capability with abundant interfaces including PCIe, USB3.1, GPIO etc. The module provides much flexibility and ease of integration for customer's applications.

The SIM8262X-M2 adopts M2 form factor. AT commands of SIM8262X-M2 are compatible with SIM8300 series modules. This also minimizes the investments of customers and enables a short time-to-market.

It is designed for applications that need high throughput data communication in a variety of radio propagation conditions. Due to the unique combination of performance, security and flexibility, this module is ideally suited for many applications.
